

In the Specification:

Please amend paragraph 0035 as follows:

---

Figure 13b is a cutaway of the breech block with the loaded state display; ~~AND~~

*M* [Please amend paragraph 0036 as follows:]

Figure 14 shows a partially cutaway detailed view of a firearm as claimed in the invention with a dismounting clip; and

Figure 15 is a detailed view of the guide groove on the frame leading to the frame bridge.

---

Please amend paragraph 0041 as follows:

---

*MB* On the frame 2, after its assembly, there is a guide groove 19, of which in Figure 1 the lateral boundary 20 formed by the right-hand frame part 2b is apparent. The guide groove is used when the barrel tube 7 is placed from the rear into the hole 11 of the frame bridge 10 for lateral fixing of the barrel block 6 by accommodating the guide rib 16 mounted on the bottom of the barrel block 6. A detailed view of the guide groove is shown in Figure 15.
